

ACCESS TO CLEAN — AND — SAFE DRINKING WATER FOR EVERYONE

wholeworldwater.co

WHOLE WORLD Water is a global Hospitality & Tourism campaign designed to provide clean & safe drinking water to the 1 billion people who don't have access.

And it's surprisingly simple!

1

Become a member of WHOLE WORLD Water

2

Replace commercially branded bottled water with filtered water - filtration systems run around \$400 per month, and the reusable glass bottles cost \$4-\$7 each.

3

Sell the bottled water for \$ (whatever price point you are comfortable with) and contribute 10% of the proceeds to the WHOLE WORLD Water Fund. 100% of the monies raised will be invested in clean & safe drinking water projects and innovations locally, and globally.

The filtration system and bottles pay for themselves usually over a period of 3 months, and our members have realized an income increase up to 25%, proving that environmental and economic progress are not mutually exclusive. You will witness a more robust bottom line, and become part of a global marketing campaign built on solutions, transparency and action with the potential to raise more than \$1 billion annually in the fight for clean and safe water for everyone. This is a truly sustainable solution!
